SR Mobile

Description

SR Mobile or we can say as “**Song Request Mobile**” is a mobile application that focuses on helping the user to request any song or music that they want to listen in a certain place through the application. This application is based on **Android Operating System**.

This application is targeted to any people who'd like to listen and want to request their favorite music through the application in a certain location and it will be listed before the song going to be played. The user will be asked to log in & register first before they can request a song in the SR application.

Note

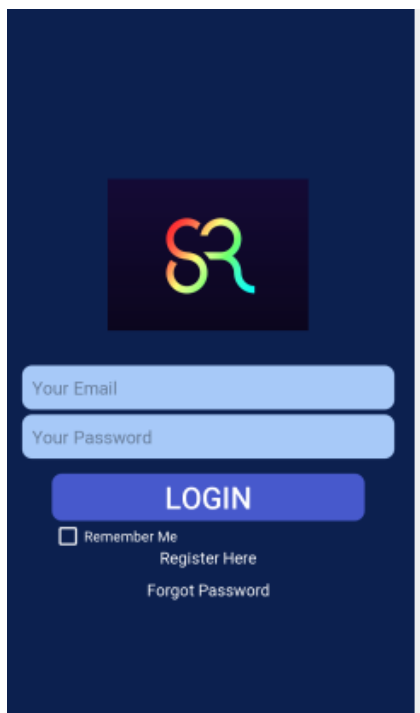

- This project include the SRMobile java class code, activity_main.xml & layout blueprint, interface output for each operation (design), input-process-output overflow from splashscreen – login – register – main menu.
- In this project, the backed system is stored in the free hosting that I already create which is <https://srmobileapp.000webhostapp.com/> by using free hosting from 000webhost.com
- And for the PHPMYADMIN, I also screenshot the picture of PHPMYADMIN in this documentation below
- The code is error free from the splash screen until the main menu.
- In the main menu, you can see there are some location that determine the place of each area. When you click each area, then it will open the area activity page where you can see the detail of the area including the information about the area itself and also the song that you can request in that area.
- You can click the song if you want to request it and click button request if you already sure about that.
- Then the requested song will be shown in the cart list in the main menu.
- I have done my best up until now, even it's not implementing some advance feature like google maps, sensor, etc. But, I'm quite satisfied with my work for this project.

Splash Screen

Login Screen

The login screen has a dark blue background. At the top center is the same 'SR' logo as on the splash screen. Below the logo are two light blue input fields: the first is labeled 'Your Email' and the second is labeled 'Your Password'. Under these fields is a blue button with the text 'LOGIN' in white. Below the button are three links: 'Remember Me' with an unchecked checkbox, 'Register Here', and 'Forgot Password'.

PHPMYADMIN (SRMobile)

The screenshot shows the phpMyAdmin interface for a database named 'id9116475_srmobileapp'. The left sidebar displays the database structure with tables: AREA, CART, SONG, and USER. The main panel shows the 'Structure' tab for the 'AREA' table. The table has 4 columns: AREID, NAME, PHONE, and LOCATION. The table is using the MyISAM engine with latin1_swedish_ci collation. The table size is 2.2 KiB. The table is currently empty.

Table	Action	Rows	Type	Collation	Size	Overhead
AREA	Browse Structure Search Insert Empty Drop	3	MyISAM	latin1_swedish_ci	2.2 KiB	-
CART	Browse Structure Search Insert Empty Drop	1	MyISAM	latin1_swedish_ci	2.1 KiB	-
SONG	Browse Structure Search Insert Empty Drop	4	MyISAM	latin1_swedish_ci	2.1 KiB	-
USER	Browse Structure Search Insert Empty Drop	6	MyISAM	latin1_swedish_ci	2.5 KiB	-
4 tables	Sum	14	InnoDB	utf8_unicode_ci	8.8 KiB	0 B

AREA

The screenshot shows the phpMyAdmin interface for the 'AREA' table. The table has 4 columns: AREID, NAME, PHONE, and LOCATION. The table is currently empty. The interface shows the 'Structure' tab for the 'AREA' table. The table has 4 columns: AREID, NAME, PHONE, and LOCATION. The table is currently empty.

AREID	NAME	PHONE	ADDRESS	LOCATION
1	Aman Central	01934558488	Jalan Alor Setar	Alor Setar
2	Cafe Merah	0156766456	University Utara Malaysia	Simtok
3	C-Mart	01944674445	Jalan Changlun	Changlun

CART

The screenshot shows the phpMyAdmin interface for the 'id9116475_srmobileapp' database. The 'CART' table is selected, and its structure is displayed. The table has columns: ORDERID, SONGID, USERID, SONGTITLE, STATUS, and PRICE. A single row of data is visible.

ORDERID	SONGID	USERID	SONGTITLE	STATUS	PRICE
1	2	US001	Alan Walker - On My Way	not played	0

SONG

The screenshot shows the phpMyAdmin interface for the 'id9116475_srmobileapp' database. The 'SONG' table is selected, and its structure is displayed. The table has columns: SONGID, SONGTITLE, SONGPRICE, and AREALID. Four rows of data are visible.

SONGID	SONGTITLE	SONGPRICE	AREALID
1	Alan Walker - On My Way	5.00	1
2	Marshmello - Silence	0	3
3	Cash Cash - Hero	0	2
4	illenium - Awake Finale	5	1

USER

The screenshot shows the phpMyAdmin interface with the 'USER' table selected. The table contains 11 rows of user data. The interface includes a sidebar with a database tree, a top navigation bar, and a main content area displaying the table data. The table has columns for EMAIL, PASSWORD, PHONE, NAME, and LOCATION. Below the table, there are options to check, edit, copy, delete, or export the selected rows. The bottom of the screen shows a Windows taskbar with various application icons and the system clock.
